About Dall Energy

Dall Energy is a Danish Engineering company specialized in biomass technologies for district heating.

Dall Energy's core business is to provide wood chip fired heating plants in the size range of 2-10 MW.

The Dall Energy combustion system provide unique features such as

- Very high energy efficiency through use of air moisturizing technology
- Multifuel oven which can burn various types of fuels with moisture content 0-60%
- Low maintenance

Dall Energy also provide consultancy within biomass combustion and gasification technologies.

Dall Energy partners: Spraying System, USA and SEM steel industry, Denmark
